

The CS TimeClock Web Interface currently has very limited support for Job Costing. You can only add jobs and change the clock's behavior using the "[Scripts](#)" menu. For the calculation of Job Hours you require the [TNA](#) or a third-party software package.

## Jobs

You can add, change or remove jobs from the "Jobs" menu.

Browse Jobs			
ID	Description		
4	Admin Project	▲	✖
1	Boiler Maintenance	▲	✖
3	Engine 4AAFE	▲	✖
5	Filing	▲	✖
2	Project Avcomms	▲	✖
6	Verification	▲	✖

To add a job, click on "Add Job", enter the job description and click on "Save".

**Add Job**

Description:

To change a job description, click on the blue triangle next to the job. To remove a job, click on the red cross next to the job you wish to remove.
