

## Introduction

The MK2 & MK3 has no external cosmetic differences but rather all the work has been done under the hood. It boasts a complete new motherboard with improved processor. As a result it has more features such as Digital IO inputs. The MK3 also allows for better support when introducing new features & possibilities for expansion.

## Feature Comparison

	MK2	MK3
		
Duplicate finger identification		
Access control (Anti-Passback, Timezones, Access areas, Pathing)		
Onboard digital inputs (Interlocking, open door sensing & Breathalyzer integration)		
New Ajax enabled web interface (Basic Time management)		
World renown Lumidigm technology		
Power over Ethernet (Optional)		
New robust surface mount ARIA processor		
Replication (Update direction between clocks)		
Improved network security through rolling password		
Integrated GPRS module		
New multi host replication (MCR)		
TCP/IP & USB & RS485 communication		

Portable GPRS model		
Optional Holtek fingerprint sensor		
Limited SMS functionality on GPRS clocks		
Support for wider range of WIFI dongles		
Limited outdoor use - IP30 rated		
Alphanumeric key sequence		

### Subtle MK3 Perks

- Supports displaying a comment for who authorised a manual clocking on the clock.
- Supports multiple FP reader models such as Futronic, Lumidigm & Holtek.
- Supports comments for which supervisor enrolled a particular employee.
- Supports comments for which supervisor deleted a particular employee.
- Multiple retries for presenting fingerprint in verification mode.
- Four options for adding manual clockings on the clock, Payroll, Access Pay/Acc & Job.
- Option to force presenting fingerprint supervisor authorization.
- Domain names for Multi Host Replication.
- Optional build in battery (Holtek fingerprint option only).
- Remote Lumidign external slave readers.
